PROFESSIONAL EXPERIENCE

Corporate Partners Teaching Assistant

James Hardie Building Products, The Data Mine

August 2026 - Present

West Lafayette, IN

- Coordinate priorities and deliverables for a 14-student team as the primary liaison between students, faculty, and corporate mentors, facilitating weekly lab sessions, mentor meetings, and Agile sprint planning
- Guide the team's research and development of an AI-powered home remodeling software for the James Hardie product portfolio, integrating generative AI, recommendation systems, and computer visualization to personalize renovation suggestions based on homeowner preferences

Digital Product Management Intern

Ecolab

June 2026 - August 2026

Naperville, IL

- Conducted customer and stakeholder research, along with user analytics to identify high value applications for an AI-powered data visualization solutions, redirecting an ambiguous project idea toward product roadmap aligned use cases
- Evaluated buy versus build alternatives for data visualization capabilities, analyzing the costs and business implications of developing an internal AI solution versus adopting a third-party platform
- Translated customer insights into actionable development priorities, collaborating with engineering and product teams to define requirements for charting and editing features
- Presented product recommendations and a working proof of concept demonstration to leadership, positioning the AI visualization agent as a reusable foundation across ECOLAB3D products

Data Assistant

Purdue University College of Science Office of Data Management

May 2025 - May 2026

West Lafayette, IN

- Delivered reports and dashboards translating academic and operational data into actionable insights. Collected, cleaned, and validated student and program data across multiple sources using Excel, Table, R and Python to ensure accuracy and consistency for institutional reporting
- Improved data workflows by documenting processes and building more efficient approaches to recurring reporting and analysis tasks, increasing accessibility of data for stakeholders

ACTIVITIES & INVOLVEMENT

Purdue Real Estate Society

January 2026 - Present

- Build foundational skills in financial modeling and investment analysis through coursework, while attending workshops and industry panels to network with professionals and alumni.

Purdue Hurling Club

August 2024 - Present

- Earned back-to-back National Collegiate Hurling Championships (2025, 2026) and the 2025 Dr. David Pinkston Player of the Year Award, competing in fast-paced traditional Irish field sport

College of Science Ambassador

October 2024 - Present

- Represent the College of Science to prospective students and families during campus visits and outreach events, delivering engaging presentations that communicate academic, research, and student life opportunities
